

Best bed

'Dux 7007' by Duxiana

This had to be a decision we took, if not lightly, then at least lying down. It was well worth the effort. The 'Dux 7007' has a two-layer base with Swedish steel springs that conform to the body's contours, ensuring a heavenly night's sleep. But the biggest luxury is the 'Pascal' top mattress, which allows you to customise the level of support - soft, medium or firm - for your shoulders, torso and legs; your sleeping partner can set different preferences. Still not convinced? We recommend you sleep on it. ★
